Plans and specifications can be seen at Department of Public Works, Ottawa, or at the office of the architect, J. H. McLean, 10th Street, Regina, N.W.T.

CORRESPONDENCE.

We do not hold ourselves responsible for the opinions of our correspondents.

The Secretary of the Assiniboia Agricultural Society.

To the Editor of the Leader.
Sir,—The Assiniboia Agricultural Society meet on Saturday next for the purpose of appointing officers for the coming year, and it would be wise on the part of the members to be judicious in their selections. Our secretary has not shown himself alive to the interests of the society. His record at the organization of this society, as the books will show, does not reflect very much credit upon his judgment when he was anxious to establish a Farmers' Union and uniting with that of Manitoba. You were away at the time or in all probability you would be cognizant of it, in fact he wished to connect with the Old party in Manitoba. Mr. Grover destroyed this base attempt of Mr. White by a speech which will be long remembered. Yours, etc.

Whitehead.

To the Editor of the Leader.
Sir,—I permit me to add a few words in confirmation of the whole of the letter in your last week's issue, respecting the shameful way in which justice is meted out to him that is at fault. It is a pity to every settler here that at least one out of the three J. P.'s in this locality make the mistake of not being other than a dandy matter as compared to his own business. If the defendant in the case be upon the merits of the case, the other man, attorney, and so it will ever be while J. P.'s are created out of machine peddlers and others, who are depending upon the settler for their livelihood. It is quite time the administration of justice, here at least, was looked into by those in authority. So the complaint is every case will not be handicapped by the business consideration of the J. P.'s.

MILL.

To the Editor of the Leader.
Sir,—Are we ever to hear the last of Riell? There is appeal after appeal and the courts of justice let it be so, but why the farce of appealing to the Privy Council after that appeal has been made, and a final examination to decide upon Riell's sanity, should have been enacted, I fail to see. If there is any doubt about Riell's sanity the Privy Council must have acted before the appeal was carried to Great Britain, and one would think that the right and proper course would have been to have removed that doubt before that appeal was made not after. I think there is one under the impression that an appeal would be final, whereas we are now confronted by a medical examination.

The Rebate System.

To the Editor of the Leader.
Sir,—Since the Hon. Mr. White's visit to Regina, the matter of dealing with pre-emption lands has been the subject of considerable comment, and since it is now the subject of the attention of the courts, it is not too much for the actual settler to pay, therefore, many propositions have been advanced, which are reasonable and should be arrived at, and which the bonafide settler could be best enabled to pay. It is not the critic that is wanted, but a considerable period. Among these the scheme, which to my mind, best adapts itself to the settler, and which is supported by the Hon. Mr. White, is a good one, is what has been applied to the Rebate system.

Success to the C. P. R.

To the Editor of the Leader.
Sir,—The requirements of settlers of the C.P.R. have been generally granted, and the mill at Indian Head, the only flouring mill at the present time, is being built by Messrs. Brown and Mossman, the wheat to be ground and the flour returned to same person who shipped the wheat. For example, if 100 lbs. of what is shipped from Pease, the regular rate is 21 c. per hundred lbs., instead of 42 c., as per regular tariff. On a shipment of 100 lbs. of what is shipped from Pease, a saving of \$4.00 for pocket money. Certain advantages are secured by the C.P.R. and it is simply made a proposition that any settler who has taken of this rate, which is actually the pioneer farmer's benefit, and as a reward for his services, and his timely consideration in meeting the wants of the settlers. Below is a list of the special rates from different points in territory.

How Water May Wash into the Well.

To the Editor of the Leader.
Sir,—The water in the well I have seen water, instantaneously converted into ice. I have had that water reduced to a temperature lower than 38 degrees Fahrenheit and still not frozen. I have seen water raised to 38 degrees Fahrenheit which, when agitated, suddenly exploded with such force as to nearly empty the tub containing it. The instantaneous formation of ice I saw in a large tin pail filled with water. The water was on the floor, cup partly filled with water, held coverings of ice, but the water in the pail was as clear as crystal. Intending to dip a cupful, I accidentally struck the edge of the pail, the water in the pail was as clear as crystal from the sides of the pail toward the center, long slender needles of ice, beautifully marked on their edges. These needles in a few seconds grew until the water, for an inch or so below the surface, was nearly as clear as crystal. These delicate objects, which when my cup reached them, easily shattered.

Workhouse boy, who had been apprenticed to a small farmer, brought home a pig.

To the Editor of the Leader.
Sir,—A boy who had been apprenticed to a small farmer, brought home a pig. The farmer said, "Did they best you?" Boy—"No, sir." Farmer—"Then why did you run away?" Boy—"I did, they said it, and we had far to eat. Then a cat died, and they said it, and a dog died, and they said it, and a grand-mother died, and I said 'em taking some salt upstairs, so I run away." London Times.

SEVEN GOLD REEDS

Seven gold reeds were found in the mountains of the Himalayas. The gold was found in the mountains of the Himalayas, and the reeds were found in the mountains of the Himalayas. The gold was found in the mountains of the Himalayas, and the reeds were found in the mountains of the Himalayas.

The Elements of Contagion and How They May be Dealt with.

An array of curious glass jars, round, oval, long and serpentine, were grouped on a table in the lecture-room of the Ontario Medical College in Brockville recently. Dr. J. C. Foreman delivered a lecture on the elements of contagion. The doctor demonstrated with chemical experiments many of his statements. Many of the contagious diseases of man, and the means of their spread, are every ready to assail him with destruction. The individual and is known as the elements of contagion. The elements of contagion are the elements of contagion. The elements of contagion are the elements of contagion.

WESTWARD HO!

Calgary "the Land of Freedom"

Judge Travis Sends Councilor J. Clark Down for Six Months

Great Indignation Meeting on Monday Night etc.

Special from our own Correspondent

Calgary, Nov. 19th.—When leaving Regina to get a peep at the magnificent Society Mountain scenery, I promised I would get out at Calgary and if I found anything worth sending you I would send it.

I cannot say I fell very happy on my arrival in this stirring town of Alberta. You know how fascinating railway travelling is—but putting up at the Royal I soon got into the good graces of mine host, Kelly, who made me as comfortable as a turbaned dervish, after a bowl of jellied Mocha coffee.

After a little I strolled out to get a view of the "city." You don't know any of its streets I suppose, but I will merely remark that, though there are no Broadway or Ontario Squares here one cannot help feeling that Stephen-Avenue "is bound" to become something and that Main street has a future before it. There is an old saying in the Emerald Isles that wherever you go you meet a "charack man" in this case meet not a starvart adon of Tipperary, but a bouid Belfast man who carries with him in his far west all the traits and history of his native city. After my friend had shaken my hand till I fairly wined under the welcoming operation he kindly suggested with all earnest that I go with him and take a "half one." "You haven't got such a thing here," said I rather scornfully. "We haven't," replied my friend, "but I should smile—what do you take us for? Well, half-one are plenty as blackberries in Calgary. They make to get their like our Sunday girls in Lissen Hall."

On Monday day a trail over the sequel. I am informed that one can keep a secret as good as Julius himself.

After supper there was no talk at the "Boys" but the Clarke case. The facts as far as I can remember are these: On Monday evening, 12th inst., two policemen in plain clothes, entered Clarke & Beaudin's saloon looking for whiskey. The Clarke objected to his premises being searched without a warrant and an altercation ensued. For this amiable Clarke was arrested and committed to jail. Herzhner for trial before the Municipal Council.

The case came off on Friday before Judge Travis and the greatest public indignation manifested. After the examination of Col. Herzhner, the Honorable Assistant and Corporal Bradstreet for the prosecution, Joseph Beaudin for the defence swore he saw Constable Clark use no weapon or threats towards the police. Messrs Murdoch and King testified to the previous good character of the prisoner.

I was very much with the reply of Judge Travis. After concerning the police and town authorities for allowing the prohibition act to be openly violated, he instructed a case where he himself had seen two men drunk on the street on Sunday. A woman on another occasion had come to him suffering from wounds inflicted upon her by a brutal husband. She declared that "quid moris" had been sold her the previous night on whiskey.

The Judge had the police wear an absolute neutrality in Calgary. In that case, Herzhner's punishment as the law books provide two years in jail with hard labor, but he would only sentence prisoner to six months. At his hearing at the Mayor's Hall on Monday night at which the mayor presided, resolutions were moved condemning the Bill relating to appeals in capital cases to come off today.

Judge Richardson: Let the second reading of the Bill stand over for the present, which the Council adopted. Mr. Jolly rose to ask some question as to the issuing of marriage licenses. A motion was made to adjourn the matter.

prepared business before the House. Besides the adjournment would give an opportunity to the committee on with their report.

Col. McLeod seconded the motion.—Carried.

Council adjourned till 8 p.m.—Friday (FRIDAY, 12th NOV.)

His Honor took the chair at 2:15 p.m. also present—Judge Richardson, Messrs. Wilson, Marshall, Messrs. W. D. Perley, Marshall, Hughes, Second, Jolly, Col. Irvine, Jackson, Wilson and Cunningham.

Minutes of Wednesday's meeting were read and adopted.

Mr. Marshall read a petition praying a municipality to be called the White-Wood Municipality be created. It was referred to the Municipal Committee.

Motions to have been moved by Mr. Turpin, Lord Boyle and Mr. Ross were allowed to stand Monday.

In reference to Mr. Jolly's motion for a return of accounts of Dominion Government grants received and expended by the Territories, His Honor said he did not think he would be willing to give the Clerk who was to be instructed to furnish it.

MARRIAGE LICENSES.

Mr. Second moved for a Return showing names of all issuers of Marriage Licenses appointed since the passing of the Marriage Ordinance. The number of such licenses issued to each of them, the amounts received from them for the same, and the names of the last return from each issuer be laid on the table.

Mr. Marshall said he had a resolution which he wished to bring before the Council, but he did not much care for its adoption in the present circumstances.

Mr. Richardson: There is a Dominion Bill relating to this matter. The subject then dropped.

Dr. Wilson moved that the petition of the citizens of Edmonton in reference to the surveying and opening of the trail to Peace River presented to His Honor the Lieutenant-Governor in Council last Session be referred to the table and referred to the committee appointed to memorialize the Dominion Government.

Col. McLeod seconded the motion.—Carried.

His Honor: There is the second reading of the Bill relating to appeals in capital cases to come off today.

Judge Richardson: Let the second reading of the Bill stand over for the present, which the Council adopted.

Mr. Jolly rose to ask some question as to the issuing of marriage licenses. A motion was made to adjourn the matter.

Nitrate of Soda for Wheat.

In reply to many inquiries, we would say that the application of nitrate of soda to winter wheat, is almost invariably beneficial, but not very profitable. The profit depends on the price we get for the wheat.

It is not a fertilizer, but a stimulant of the soil, or vegetable-matter, plowed in, or from manure. If a plow under a crop of clover, or alfalfa, or timothy, the nitrogen of the organic matter is converted into nitrate, and the growth of wheat plants will be increased.

For this change, moisture is necessary. On a fall from which the crop of clover, or other grain, has just been removed, nitrate is comparatively dry, and this change process is very slow, or not at all. It was a summer fallow, we get the desired nitrate. Now, it is highly probable that where we now wheat after clover, or other crop, and if the soil is not so dry, it should find it profitable to drill in, immediately under the seed, a small quantity, of nitrate of soda.

Now, it is highly probable that where we now wheat after clover, or other crop, and if the soil is not so dry, it should find it profitable to drill in, immediately under the seed, a small quantity, of nitrate of soda.

It is not a fertilizer, but a stimulant of the soil, or vegetable-matter, plowed in, or from manure. If a plow under a crop of clover, or alfalfa, or timothy, the nitrogen of the organic matter is converted into nitrate, and the growth of wheat plants will be increased.

For this change, moisture is necessary. On a fall from which the crop of clover, or other grain, has just been removed, nitrate is comparatively dry, and this change process is very slow, or not at all. It was a summer fallow, we get the desired nitrate. Now, it is highly probable that where we now wheat after clover, or other crop, and if the soil is not so dry, it should find it profitable to drill in, immediately under the seed, a small quantity, of nitrate of soda.

Complaint is made that nothing fit to eat can be had in Cuba.

Mother's Grave Worm Exterminator has no equal for destroying worms in their hatched state, but not way of the soil.

Thomas' Pipe of Kingston, N.Y., has reported ten cures from my feet and hands, by the use of Hallway's Ointment.

A great for Stomach, Dr. Davis and Snow's new blood-purifier will cure the most obstinate cases of the skin.

Home, a place in Georgia, hasn't had a death since the action of disease germs had, upon the system, producing cholera, dysentery, and many dangerous diseases.—Burdock Blood Purifier regulates the bowels, liver and blood, and wards off and cures malaria.

Never before said to be promotive of murder in Baltimore.

Direct relief follows the use of Hagedorn's Yellow Oil, in case of pain, rheumatism, neuralgia, lumbago, sciatica, sore throat, asthma, croup and all ailments of the flesh. Yellow Oil is an internal and external remedy that should be kept in every household.

The cultivation of the bamboo has proved quite successful in California.

A. B. DesRochers, Arthabaska, P. Q., writes: Thirteen years ago I was settled with a severe case of all sorts of ailments from which I nearly constantly suffered until after having used Dr. Thomas' Electric Oil for nine days, bathing the head etc., when I was completely cured and have only used half a bottle.

The London Truth tells of a dog that killed all dogs to get out of a Sunday after being shown a proper look.

To lessen mortality and stop the spread of disease, use Northrop & Lyman's Vegetable Discovery and Dypapic Cure for all diseases arising from impure blood such as pimples, blotches, biliousness, indigestion etc. It is a new and safe medicine for dyspepsia. I have tried many remedies, but this is the only one that has done me any good.

Charles XII. of Sweden was killed 30, after having spent his last years in command of his army.

A. D. Noyes, Newark, Mich., writes: I have enquired at the drugstore for Dr. Thomas' Electric Oil, but have failed to find it. We brought a bottle with us from Quebec, but it is nearly done and I do not want to be with it, as my wife has a severe case of rheumatism, and nothing else gives relief. Can you send us some?

The largest fortunes accumulated in Ireland have come from the liquor business.

DEBILITY.

This is an epidemic worse and more distressing than an ordinary cold, and requires prompt remedies to break it up. Dr. Cassell's Peppermint Cure is a truly reliable remedy for all forms of colds and their dangerous results.

A scheme is afoot in France to convert Paris into a seaport town. It is proposed to build a ship canal from the sea coast to the capital.

DEBILITY.

Perhaps you are weak weary, all run down, get tired out with slight exertion, feel faint and dizzy, write and languid, then you need a good tonic to regulate, to make pure blood circulate and give you strength. Try Burdock Blood Purifier—It will do you good.

The oak tree is planted by Lord Byron at Newstead Abbey in large and flourishing, although the Alder on which he cut the name "Byron and Augusta" long since died.

DEBILITY.

These gravel and dangerous complaints are due to a bad condition of the blood, unwholesome changes in the blood and secretions—the liver being equally at fault with the kidneys. Regularly these conditions with Burdock Blood Purifier, one of the best system renovators known to medical science.

DEBILITY.

Smokes the popular and reliable brand, "Cable" No. 1 Patent, and "Molton."

CURED OF DRAPEES.

Harry Ricardo, of Toronto, was deaf for eight years, and also suffered with Chronic Rheumatism. After all else failed, he used Dr. Williams' Pink Pills for Pale People, and was cured.

J. H. McTavish, LAND COMMISSIONER.

NORTHWEST COUNCIL.

Wednesday, Nov. 11.

His Honor took the chair at 2:15 p.m. Also present, Messrs. Richardson, Ross, Ross, O'Brien, Boyle, Marshall, Hughes, Peckey, Second, Jolly, Cunningham, Wilson, Irvine, Jackson and McLeod.

Check over minutes of yesterday's meeting which were adopted.

Mr. Cunningham presented a petition from the settlers on the north side of the Creek Settlement with regard to the erection of a bridge across Stratton creek river. Petitioners asked for \$5000 granted towards the construction of the bridge.

It was referred to the Miscellaneous Committee.

Moved by Mr. Jolly, seconded by Mr. Peckey and carried.—That the following be a special committee to consider and advise if necessary the existing ordinance respecting contagious and infectious diseases among cattle, horses and swine, Messrs. Bedford, Ross, Jackson, Boyle and the mayor and aldermen.

Mr. Boyle moved that a special committee consisting of the members from Messrs. Col. McLeod, Mr. Giddes, Dr. W. Wilson, Mr. Cunningham and Mr. Peckey be appointed to consider and report on the petition relating to the marking of the Dominion Committee.

Mr. Wilson seconded the motion which was carried.

Mr. Jolly introduced an ordinance to regulate the procedure in appeal to the Court of Queen's Bench, Manitoba, in capital cases.

Col. Richardson moved that the Bill be read a second time on Friday.

Mr. Jolly moved that the Bill be read a second time on Friday.

Mr. Jolly moved that the Bill be read a second time on Friday.

Wednesday, Nov. 11.

Very little business to-day. His Honor took the chair at 2:15 p.m. The following motions were carried: That all communications respecting the franchise of the Dominion No. 28 1884 be laid on the table. Moved, Mr. Second, seconded, Judge Richardson.

Mr. Second moved: That the mover have leave to introduce an Ordinance respecting the medical profession. Sec. by Col. McLeod, and carried.

Moved by Mr. Second, seconded by Mr. Wilson, and adopted: That the mover have leave to introduce an Ordinance respecting the medical profession. Sec. by Col. McLeod, and carried.

A Bill for the purpose of regulating the freedom in appeals in capital matters was read a second time and committee to be appointed in the whole, with Judge Richardson in the chair.

Progress reported and the Bill referred to a standing committee on Civil Jurisdiction. On the motion of Col. McLeod the Council adjourned.

Thursday, Nov. 12.

His Honor took the chair at 2:30. Also present, Judge Richardson, Messrs. Ross, O'Brien, Boyle, Marshall, Hughes, Peckey, Second, Jolly, Cunningham, Wilson, Irvine, Jackson and McLeod.

A motion by Mr. Peckey that he would move a committee be struck to inquire into the petition of the Fines Ordinance was before the Council.

Lord Boyle moved for permission to bring in his ordinance with regard to the Fines Ordinance, which was carried.

Mr. Jackson pointed out that the under-lying petition of Lord Boyle in reference to Lord Boyle's ordinance, would bring in an ordinance for a bounty on rabbits in the present year.

Wednesday Nov. 12. The Council sat at 2 o'clock and got through routine business.

WIDOWS AND ORPHANS.

There is one point in milking that we wish to call the dairymen's attention to: it is the position of the bucket when the milk is drawn. It is not only a matter of order and tidiness, but it is a matter of safety. The bucket should be held in such a position that the milk will not splash out, and that the milk will be drawn in a steady stream.
